

Privacy and Data Handling Standard

Fictitious compliance test document — Sentinel V5 sample data

Data Classification

Information is classified as Public, Internal, Confidential, or Restricted. Restricted information includes sensitive customer records and credentials.

Retention

Customer records must be retained only for the approved business or legal retention period. Records reaching the end of their retention period must be securely deleted or anonymized.

Transmission

Confidential and Restricted information must be encrypted during transmission. Employees must not send Restricted information through personal email or consumer file-sharing services.

Data Subject Requests

Privacy requests must be logged and routed to the Privacy Officer. Requests should be acknowledged within five business days and tracked through resolution.
